USE OF THE INDEX.—If Abergele is the required name, a reference to the Index will show that it is situated in Wales. The contents list gives the number of the map of Wales; and the position of Abergele can then be fixed by the Latitude figures on the sides of the map, which show how much the place lies North of the Equator (53.17 degrees N.), and by the Longitude figures on the top and foot of the map, which show how much it lies West of the meridian of Greenwich (3.35 degrees W.).
